# 1. Investment Overview

---

## 1.1 Company Overview

### (a) Chilean Lithium Projects

The Company has entered into a joint venture arrangement for the exploration and development of three lithium brine projects in Chile, comprising the Salar West Claims, Pajonales Claims and Natalie Claims in the Salar de Atacama and surrounding areas in northern Chile (**Chilean Lithium Projects**). The Company may earn up to a 50% interest in Lithium Chile SpA (**LCS**), the company which owns the Chilean Lithium Projects.

The Chilean Lithium Projects are located in the 'lithium triangle' region of the Andes, encompassing parts of northern Chile, south-west Bolivia and north-west Argentina. This region hosts over 50% of the world's lithium resources and the largest and highest grade lithium brine deposits in the world.

The Chilean Lithium Projects comprise three areas of over 20,000 hectares (in total) in the Salar de Atacama, Salar de Pajonales and Salar de Tuyajto-Natalie regions of Chile.

The transaction followed an extensive period of review and evaluation by the Company of strategic investment opportunities. The Company identified battery minerals, principally lithium and cobalt, as high priority targets. Chile was prioritised being one of the world's best locations for low cost, high grade lithium brine opportunities.

BMG is now preparing for its maiden drill program at Salar West following the recent TEM Geophysical surveys undertaken by the Company which identified strong conductive units analogous with lithium brines. The drilling program is anticipated to comprise 2 holes of around 200m each in the key conductive units in the Southern area (6,300 Ha) of Salar West identified in the recent geophysical surveys undertaken by BMG – refer ASX announcement on 8 April 2019. The initial drilling is expected to take 2 to 3 weeks from commencement, with first results to follow soon thereafter.

For further information on the Chilean Lithium Projects, refer to the Company's most recent announcement to ASX made on 24 June 2019 and the Company's announcements from 22 August 2018 to 18 February 2019, copies of which can be found on the Company's website ([www.bmg.com.au](http://www.bmg.com.au)) or the ASX announcements webpage for the Company (ASX Code "BMG").

Refer to Section 8.2(a) for further information on the terms of the agreement under which the joint venture is to be established and the Company may earn a 50% interest in LCS.

### (b) Treasure Project

BMG owns 30% of Treasure Development Limited (**TDL**) which owns the Treasure Project in Cyprus, where it has been exploring for high-grade copper-gold-zinc-silver and nickel-copper-cobalt-gold deposits. New Cyprus Copper Company Ltd (**New Cyprus**) owns 70% of TDL and is maintaining and funding TDL and the Treasure Project, with BMG retaining a free carried interest.

The Treasure Project has four project areas and currently comprises 10 licences for a total of 36.7 km<sup>2</sup>. It includes nine advanced prospects where copper (+Au-Zn-Ag) was mined after 1920 and eleven other prospects where evidence of similar mineralisation is exposed. In addition, the Black Pine project area contains the Pevkos and Laxia Prospects where exposed massive sulphide veins containing very high grade copper, nickel, cobalt and gold have been successfully drilled, and two other prospects that are yet to be drilled.

New Cyprus is currently preparing an exploration programme to be agreed by BMG, and once completed during the next 1 - 2 years, BMG will transfer to New Cyprus an additional 20% of TDL (bringing New Cyprus's interest to 90%) and BMG will retain a 10% free-carried interest in TDL.

New Cyprus may increase its interest in TDL to 100% by acquiring the remaining 10% of TDL by either:

- (i) payment to BMG of \$2 million in cash within 12 months of reaching its 90% interest; or
- (ii) payment to BMG of a 1% net smelter royalty until \$2 million is received by BMG, plus a 10% share of any profits generated during that time.

## 1.2 Offers

Under this Prospectus, the Company makes the following offers (**Offers**):

- an offer to eligible participants, being persons who held BMGOA Options which expired exercised or unexercised, on or before 30 June 2019 (**Eligible Participants**), to subscribe for up to 346,502,334 New Options, exercisable at \$0.02 on or before 31 December 2019, at an issue price of \$0.001 each (**Issue Price**), on the basis of one (1) New Option for every one (1) BMGOA Option held; and
- an offer Eligible Participants to subscribe for the Shortfall, at an Issue Price of \$0.001 per New Option (**Shortfall Offer**).

## 1.3 Shareholder approval for New Options

The issue of New Options under the Offers is conditional upon Shareholder approval being obtained at the general meeting (**General Meeting**) of the Company on 2 August 2019.

At the General Meeting, Shareholders will vote to approve the offer and issue of New Options and subsequently, New Options issued under the Shortfall Offer, if any, under this Prospectus.

Please refer to Section 8.1 for further information.

Related Parties of the Company will not be eligible to participate in the Shortfall Offer under this Prospectus.

## 1.4 Purpose of the Offers and proposed use of funds

<b>TOTAL</b>	<b>\$2,035,544</b>	<b>\$2,208,795</b>
<b>Use of funds</b>		
Costs of Offers	(\$21,606)	(\$25,606)
Retained as Working capital and for any other necessary cash outlays relating to the Chilean Lithium Project Joint Venture	(\$2,013,938)	(\$2,183,189)
<b>Total</b>	<b>(\$2,035,544)</b>	<b>(\$2,208,795)</b>

### Notes:

1. The information in the above table is current as at the Prospectus Date. The use of funds may change depending on any intervening events or changes in the Company's circumstances. The Board reserves the right to change the way funds are used and applied.
2. The above cash on hand balance is consistent with the Company's Appendix 5B for the quarter ended 31 March 2019 which the Company announced to the ASX on 30 April 2019. This balance differs to the cash on hand balance in the Company's proforma statement of financial position in Section 3 which is prepared by recognising adjustments to the Company's most recently published statement of financial position which was contained in the Half Year Financial Report announced to the ASX on 14 March 2019.
3. Costs of the Offers include the other costs identified in Section 8.7.

New Options to be issued under the Options Offer and Shortfall Offer will be issued at a nominal issue price of \$0.001 each New Option. However, the Company may receive up to approximately \$6,900,000 (before costs) if all of these New Options (346,502,334 New Options) are issued and exercised. Such funds will be applied by the Company to its working capital requirements at that time.

## 1.5 Key risks

Activities in the Company, as in any business, are subject to risks which may impact on the Company's future performance. In addition to the risks described in detail in Section 5, prospective Applicants should be aware of the following (non-exhaustive) key risks which have particular application to the Company's operations and projects at this time.

<b>Risk</b>	<b>Description</b>
<b>Option Risk</b>	<p>The Prospectus is for the offer of New Options, exercisable at \$0.02, on or before 31 December 2019.</p> <p>There is a risk that New Options subscribed for by Eligible Participants will be out-of-the money (exercise price of New Options will be more than the Share price) on or before expiry of the New Options on 31 December 2019. Under these circumstances it is unlikely Eligible Participants will exercise their New Options; thus, there is a risk that their New Options will expire valueless and Eligible Participants will lose their initial capital investment amount.</p>
<b>Future capital requirements</b>	<p>The Company will most likely require further financing for its future business activities, in addition to amounts raised pursuant to the Offers. The terms of any future equity financing are unknown at this time and will depend on a variety of factors, and could be dilutive to Shareholders, if undertaken at lower prices than the current market price or may involve restrictive conditions which limit the Company's operations and business strategies. There cannot be any assurance that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all.</p>

Applications for New Options must be submitted on an Application Form attached to or accompanying this Prospectus (other than if the Applicant makes a BPAY® payment – refer to Sections 3.1(c) and 3.2(c)). An Application Form must be completed in accordance with the instructions set out on the back of the form.

An original, completed and lodged Application Form constitutes a binding and irrevocable offer to subscribe for the number of New Options specified in that Application Form. An Application Form does not need to be signed to be valid. Once an Application has been made, it cannot be revoked.

If an Application Form is not completed correctly, it may be treated by the Company as valid at its discretion. The Directors' decision as to whether to treat such an Application as valid and how to construe, amend or complete a form is final. However, in relation to the Offers an Applicant will not be treated as having applied for more New Options than is indicated by the amount of Application Money.

Brokerage or transfer/stamp duty is not payable in relation to any of the Offers.

The Company reserves the right to refuse a completed Application Form if it has reason to believe that an Applicant has not received a copy of this Prospectus in paper or electronic form, or the Prospectus or Application Form provided to the Applicant has been altered or tampered with in any way.

If a person makes an Application, that person:

- irrevocably and unconditionally agrees to the terms of the relevant Offers set out in this Prospectus;

### **3.4 Application Money to be held on trust**

Application Money will be held by the Company on trust in accordance with the requirements of the Corporations Act until the Securities to which the Application Money pertains are issued under the Offers, or a refund of Application Money occurs in the circumstances described in this Prospectus. The Company will retain any interest earned on Application Money, including in the event of any refund of Application Money.

In the event a relevant Shareholder approval is not obtained for the offer and issue of New Options at the forthcoming General Meeting, the Company will refund all Application Money received from an Eligible Participant without interest.

Refer to Section 2.1(c) for further information about Shareholder approval of the issue of New Options.

### 3.5 **Issue of New Options**

Subject to Shareholder approval, New Options under the Offers are expected to be issued on the date specified in the Timetable.

The sale by an Applicant of New Options prior to the receipt of a Holding Statement is at the Applicant's own risk.

### 3.6 **ASX quotation – New Options**

Application for Official Quotation on ASX of New Options offered pursuant to this Prospectus will be made within 7 days after the Prospectus Date.

If permission for quotation of New Options is not granted by ASX within 3 months after the Prospectus Date, New Options will not be allotted, and Application Moneys will be refunded (without interest) as soon as practicable.

The fact that ASX may agree to grant Official Quotation of the New Options is not to be taken in any way as an indication of the merits of the Company or its Securities.

### 3.7 **Withdrawal**

The Directors may decide to withdraw this Prospectus or an Offer at any time before the issue of any New Options.

### 3.8 **Applicants outside of Australia**

#### (a) **General**

This Prospectus does not constitute an offer of New Options in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offers.

It is the responsibility of any Applicant who is resident outside Australia to ensure compliance with all laws of any country relevant to their Application, and any such Applicant should consult their professional adviser as to whether any government or other consents are required, or whether any formalities need to be observed to enable them to apply for and be issued New Options. Return of a duly completed Application Form will constitute a representation and warranty by an Applicant that there has not been any breach of such regulations.

The Company has not taken any action to register or qualify the New Options or the Offers, or otherwise to permit a public offering of the New Options, in any jurisdiction outside Australia.

#### (b) **New Zealand resident Eligible Participants**

New Options offered under this Prospectus are not being offered or sold to the public within New Zealand other than to Eligible Participants with registered addresses in New Zealand and to whom the Options Offer and Shortfall Offer are being made in reliance on the *Securities Act (Overseas Companies) Exemption Notice 2013* (New Zealand).

This Prospectus has not been registered, filed with or approved by any New Zealand regulatory authority under the *Securities Act 1978* (New Zealand).

This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

(c) **Other overseas resident Option Holders**

This Prospectus may not be released or distributed in any country other than Australia and New Zealand. The Prospectus does not constitute an offer to sell, or a solicitation of an offer to buy, securities in any country other than Australia and New Zealand.

Neither the Offers nor the New Options have been, and nor will they be, registered under the *Securities Act* of 1933 of the United States of America (as amended) (**US Securities Act**). New Options may not be offered or sold in the United States of America, except in transactions exempt from, or otherwise not subject to, registration under the US Securities Act and applicable securities laws in any States of the United States of America.

The distribution of this Prospectus and accompanying Application Forms (including electronic copies) outside Australia or New Zealand may be restricted by law and therefore persons who come into possession of this Prospectus should seek advice on and observe any such restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws.

### 3.9 **CHESS and issuer sponsorship**

The Company participates in the Clearing House Electronic Sub-register System (**CHESS**), operated by ASX Settlement (a wholly owned subsidiary of ASX), in accordance with the Listing Rules and ASX Settlement Rules. The Company operates an electronic issuer-sponsored sub-register and an electronic CHESS sub-register. The two sub-registers together make up the Company's principal register of its Securities.

Under CHESS, the Company does not issue certificates to the holders of Securities. Instead, the Company provides holders with a Holding Statement (similar to a bank account statement) that sets out the number of New Options allotted and issued to them under this Prospectus.

This Holding Statement also advises investors of either their Holder Identification Number (**HIN**) in the case of a holding on the CHESS sub-register or Security Holder Reference Number (**SRN**) in the case of a holding on the issuer sponsored sub-register.

A Holding Statement is routinely sent to holders at the end of any calendar month during which their holding changes. A holder may request a statement at any other time; however, a charge may be incurred for additional statements.

### 3.10 **Taxation implications**

The Directors do not consider that it is appropriate to give potential Applicants advice regarding the taxation consequences of applying for New Options under this Prospectus, as it is not possible to provide a comprehensive summary of the possible taxation positions for potential Applicants.

Neither the Company nor any of its advisers or officers accept any responsibility or liability for any taxation consequences to potential Applicants in relation to the Offers. Potential Applicants should, therefore, consult their own tax adviser in connection with the taxation implications of the Offers.

### 3.11 **Privacy disclosure**

The Company collects information about each Applicant from the Application Forms for the purpose of processing the Application and, if the Applicant is successful, for the purposes of administering the Applicant's Security holding in the Company.

By submitting an Application Form, each Applicant agrees that the Company may use the information in the Application Form for the purposes set out in this privacy disclosure statement.

The Company and the Share Registry may disclose an Applicant's personal information for purposes related to the Applicant's investment to their agents and service providers including those listed below or as otherwise authorised under the Privacy Act:

- the Share Registry for ongoing administration of the Company's register;
- the Company's Related Bodies Corporate, agents, contractors and third party service providers, as well as to ASX, ASIC and other regulatory authorities (including the Australian Taxation Office); and
- the printers and the mailing house for the purposes of preparing and distributing Holding Statements and for the handling of mail.

If an Applicant becomes a Security holder of the Company, the Corporations Act requires the Company to include information about the security holder (name, address and details of the Securities held) in its public register. This information must remain in the Company's register of Shareholders and Option Holders even if that person ceases to be a Security holder of the Company. Information contained in the Company's register of Shareholders and Option Holders is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its Security holders) and compliance by the Company with legal and regulatory requirements.

If an Applicant does not provide the information required on the Application Form, the Company may not be able to accept or process their Application.

Under the Privacy Act, a person may request access to their personal information held by (or on behalf of) the Company or the Share Registry. An Applicant can request access to their personal information by writing to the Company through the Share Registry.

## 4. Effect of the Offers

### 4.1 Principal effect of the Offers on the Company

The issue of New Options under the Offers will have no immediate effect on the number of Shares currently on issue unless and until the holders of New Options exercise the New Options.

The principal effects of the Offers, assuming the Offers are fully subscribed, will be to:

- increase the number of Options on issue by 346,502,334, from nil Options immediately prior to the Offers, to 346,502,334 Options; and
- increase cash reserves by up to \$346,502 (on a full subscription basis) immediately after completion of the Offers less the payment of the costs and expenses set out in Section 8.7..

### 4.2 Effect on capital structure

The capital structure of the Company following completion of the Offers, assuming the Offers are fully subscribed, is set out below:

<b>Securities</b>	<b>Full subscription</b>
<b>Shares</b>	
Shares on issue prior to the Offers	557,732,376
<b>Total Shares on issue at completion of the Offers<sup>1</sup></b>	<b>557,732,376</b>
<b>Options</b>	
Quoted Options prior to Offers <sup>2</sup>	Nil
Unquoted Options on issue prior to Offers <sup>3</sup>	Nil
New Options to be issued under the Options Offer and Shortfall Offer	346,502,334
<b>Total Options on issue at completion of the Offers<sup>1</sup></b>	<b>346,502,334</b>

**Notes:**

1. The figures in the table above assume that other Shares are not issued (including on the exercise of Options) prior to the close of the Offers.
2. 346,502,334 BMGOA Options in the Company, exercisable at \$0.02 each, expired on 30 June 2019.
3. 2,500,000 unquoted Options in the Company, at various exercise prices from \$0.35 to \$0.50 per Option, issued to the Managing Director were cancelled on 7 May 2019.

### 4.3 Effect of the Offers on control of the Company

As at the Prospectus Date, the Company has 557,732,376 Shares on issue, nil quoted Options on issue and nil unquoted Options on issue.

The New Options issued under this Prospectus will have no effect on control of the Company unless and until they are exercised. However, the Company does not anticipate the circumstance, where if all the New Options are exercised into fully paid ordinary Shares of the Company, that will result in any Shareholder obtaining a relevant interest in Shares of 20% or more.

The Company therefore does not anticipate that the Offers will have any material effect on control of the Company.

#### 4.4 Substantial holdings

A “substantial holding” is defined under section 9 of the Corporations Act to mean a relevant interest in 5% or more of the voting shares of a company.

The table below sets out the Shareholders with a substantial holding based on the Company's register of Shareholders as at the Prospectus Date.

Name	Number of Shares	Percentage interest
Mr Michael Hsiau Yun Lan	107,970,000	19.36%
Tribis Pty Ltd	78,566,978	14.09%

**Notes:**

1. Percentage interest has been calculated based on 557,732,376 Shares on issue at the Prospectus Date.
2. The figures in the table assume that:
  - (a) additional Shares are not issued after the Prospectus Date; and
  - (b) none of the Options on issue at the Prospectus Date are exercised.
3. The information in the table above has been extracted from the Company's register of Shareholders as at the Prospectus Date, and not from substantial holding notices received from, or otherwise required to be provided by, the relevant Shareholders.

#### 4.5 Pro forma statement of financial position

Set out below is:

- the statement of financial position of the Company as at 31 December 2018 which was reviewed by the Company's Auditors; and
- the unaudited pro forma statement of financial position of the Company as at 31 December 2018 incorporating the effect of the Offers, assuming scenarios for both 50% and 100% subscription under the Offers.

The unaudited pro forma statement of financial position has been derived from the reviewed financial statements of the Company, for the 6 month period ended 31 December 2018, and adjusted to reflect pro forma assets and liabilities of the Company as if completion of the Offers had occurred by 31 December 2018, and also for material adjustments noted below.

The pro-forma information is presented in an abbreviated form. It does not include all of the disclosures required by the Australian Accounting Standards applicable to annual financial statements.

The pro forma statement of financial position has been adjusted for the following material movements in the assets and liabilities of the Company between 31 December 2018 and the Prospectus Date:

- In February and March 2019 the Company issued a total of 60,075,553 Shares, at \$0.009 per share, with one free attaching BMGOA Option issued for each share, raising \$508,239 net of costs.
- The Company has liability to pay an amount of US\$250,000 cash as part consideration towards the acquisition of an interest in the Chilean Lithium Projects, using an exchange rate of 1:1.44, the Company has recognised an amount of \$360,000 as an increase to Prepayments and an increase to Current Liabilities.
- At 31 December 2018, the Company recognised a prepayment on its Statement of Financial Position of US\$100,000, reported as \$137,684, using an exchange rate of 1:1.38. The payment of this fee provided the Company an exclusive period to undertake

due diligence and execute the transaction, having undertaken due diligence and executed the transaction the Company no longer recognises this prepayment as an asset and the proforma statement of financial position now reflects this amount being recognised as an expense.

Allowance has not been made for expenditure incurred in the normal course of business from 30 June 2019 to the Prospectus Date.

With the exception of the above noted US\$250,000 which is recognised as a liability, allowance has not been made for future cash payments in relation to the Chilean Lithium Projects outlined in Section 1.1(a). The obligation to pay future cash payments in relation to this project will arise contingent upon the satisfaction of other conditions precedent.

The cash and cash equivalents below differs from the cash balance stated at Section 1.4. The cash balance at Section 1.4 is consistent with the Company's Appendix 5B for the quarter ended 31 March 2019 which the Company announced to the ASX on 30 April 2019, while the figure below is derived from the Company's most recently published Statement of Financial Position which was contained in the Half Year Financial Report announced to the ASX on 14 March 2019.

## 5. Risk Factors

---

### 5.1 Introduction

Activities in the Company and its controlled entities, as in any business, are subject to risks which may impact upon the Company's future performance. There can be no guarantee that the Company will achieve its stated objectives.

Potential investors should read the entire Prospectus and review announcements made by the Company to ASX (at [www.asx.com.au](http://www.asx.com.au) under the code "BMG") in order to gain an appreciation of the Company, its activities, operations, financial position and prospects.

An investment in the Company's Securities should be considered speculative. Securities carry no guarantee with respect to the payment of any dividends, returns of capital or the market value of those Securities.

Potential investors should consider the risk factors set out in Section 1.5 above and in Sections 5.2 and 5.3 below which the Directors believe represent some of the general and specific risks that Shareholders and/or Option Holders should be aware of when evaluating the Company and deciding whether to acquire any Securities in the Company. The following risk factors are not intended to be an exhaustive list of all of the risk factors to which the Company is exposed.

### 5.2 Additional specific risks relating to the Company

In addition to the key risks out in Section 1.5 above, the following risks have been identified as being risks specific to an investment in the Company. These risks may adversely affect the Company's financial position, prospects and price of its listed securities.

#### Exploration and development risks

- (a) **Exploration and ability to exploit successful discoveries:** It may not always be possible for the Company to exploit successful discoveries which may be made in areas in which the Company has an interest. Such exploitation would involve obtaining the necessary licences or clearances from relevant authorities that may require conditions to be satisfied and/or the exercise of discretions by such authorities. It may or may not be possible for such conditions to be satisfied. Further, the decision to proceed to further exploitation may require participation of other companies whose interests and objectives may not be the same as the Company's.
- (b) **Mining and development risks:** Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management. Mining and development operations can be hampered by force majeure circumstances, environmental considerations and cost overruns for unforeseen events.
- (c) **Exploration costs:** The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that cost estimates and underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.
- (d) **Environmental risks:** The operations and activities of the Company are subject to its environmental laws and regulations. As with most exploration projects and mining operations, the Company's operations and activities are expected to have an effect on the environment, particularly if advanced exploration or mine development proceeds. The Company attempts to conduct its operations and activities to the highest standard of environmental obligation, including compliance with all environmental laws.

- (e) **Successful development of projects:** The business of exploration, project development and mining contains risks by its very nature. To prosper, it depends on the successful exploration and/or acquisition of reserves, design and construction of efficient production/processing facilities, competent operation and managerial performance and proficient marketing of the product. In particular, exploration is a speculative endeavour and force majeure circumstances, cost overruns and other unforeseen events can hamper mining operations.
- (f) **Realising value from projects:** The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits; failure to achieve predicted grades in exploration and mining; operational and technical difficulties encountered in mining; difficulties in commissioning and operating plant and equipment; mechanical failure or plant breakdown; unanticipated metallurgical problems which may affect extraction costs; adverse weather conditions; industrial and environmental accidents; industrial disputes; and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

#### **Other risks specific to the Company**

- (a) **Commodities price and exchange rate fluctuations:** The revenue derived through the sale of mineral commodities exposes the potential income of the Company to mineral commodities price and exchange rate risks. Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include world demand for commodities, forward selling by producers and the level of production costs in major commodity-producing regions. Moreover, commodity prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, commodities.

Furthermore, the international prices of most commodities are denominated in United States dollars, whereas any income and the expenditure of the Company are and will be taken into account in the Australian dollar, exposing the Company to the fluctuations and volatility of the rates of exchange between those currencies.

- (b) **Future capital requirements:** The Company may require substantial further financing in the future for its business activities, in addition to amounts raised pursuant to the Offers. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the current market price (or the price under the Offers) or may involve restrictive covenants which limit the Company's operations and business strategy.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce, delay or suspend its operations and this could have a material adverse effect on the Company's activities and could affect the Company's ability to continue as a going concern.

- (c) **Joint venture parties, agents and contractors:** There is a risk of financial failure or default by a participant in any joint venture to which the Company is, or may become, a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.
- (d) **Competition:** The Company competes with other companies, including major mining companies in Australia and internationally. Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Company can compete effectively with these companies.

- (e) **Key personnel:** Recruiting and retaining qualified personnel are important to the Company's success. The number of persons skilled in the exploration and development of mining properties is limited and competition for such persons is strong. There can be no assurance given that there will be no detrimental impact on the Company if such persons employed cease their employment with the Company.
- (f) **Insurance risk:** In certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance of all risks associated with mineral exploration and production is not always available and where available the costs can be prohibitive.

- (g) **Potential acquisitions:** As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions of companies, products, technologies or resource projects.

### 5.3 General investment risks

The business activities of the Company are subject to various general economic and investment risks that may impact on the future performance of the Company. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. There are a number of general economic and investment risk factors that apply to companies generally and may include economic, financial, market or regulatory conditions. These risk factors include, but are not limited to, the following:

- (a) **General economic conditions:** Economic conditions, both domestic and global, may affect the performance of the Company. Factors such as fluctuations in currencies, commodity prices, inflation, interest rates, supply and demand and industrial disruption may have an impact on operating costs and share market prices. The Company's future possible revenues and Securities prices can be affected by these factors, all of which are beyond the control of the Company and its Directors.
- (b) **Equity market conditions** Securities quoted on the securities market can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. These security market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance.

General factors that may affect the market price of securities include economic conditions in both Australia and internationally, investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

- (c) **Liquidity risk:** There can be no guarantee that there will be an active market for the New Options, or that the trading price New Options will increase. Noting the current state of equity capital markets, there has been and may continue to be relatively few buyers or sellers of Shares and Options on ASX at any given time. This may affect the volatility of the market price of the Shares and Options. It may also affect the prevailing market price at which holders are able to sell their Shares and New Options.

- (d) **Changes in government policy & legislation:** Any material adverse changes in relevant government policies or legislation of Australia or internationally may affect the viability and profitability of the Company, and consequent returns to investors.
- (e) **Investment risk:** New Options offered pursuant to this Prospectus should be considered speculative due to the nature of the Company's business. There cannot be any assurance as to return of capital or the market value of New Options. In particular, the price at which an investor may be able to trade New Options may be above or below the price paid for those New Options.
- (f) **Other:** Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of the Company.

- (n) New Options are exercisable by the delivery to the registered office of the Company of a notice in writing stating the intention of the Option Holder to exercise all or a specified number of the New Options held by the Option Holder accompanied by an Option certificate and a cheque made payable to the Company for the subscription price for the exercise of the specified New Options. An exercise of only some of the New Options will not affect the rights of the Option Holder to the balance of the New Options held.
- (o) New Options will be deemed to have been exercised on the date the exercise notice is received by the Company.
- (p) The Company will allot the resultant Shares and deliver the holding statement within five business days after the exercise of the New Option.
- (q) Shares allotted pursuant to an exercise of New Options will rank, from the date of allotment, in all respects equally with existing fully paid ordinary Shares of the Company.
- (r) These terms and the rights and obligations of the Option Holder are governed by the laws of Western Australia. The Option Holder irrevocably and unconditionally submits to the non-exclusive jurisdiction of the courts of Western Australia.
