

**Brazilian Metals Group Limited**

ACN 107 118 678

26 September 2013

**COMPANY UPDATE  
BLACK PINE PROJECT, CYPRUS**

Brazilian Metals Group Limited (ASX:BMG) (**BMG or the Company**) would like to inform shareholders that there will be a delay releasing the final assay results from its maiden drilling programme at the Laxia prospect due to technical issues at the laboratory undertaking the assays.

BMG has been informed by the laboratory that there were technical issues with the equipment during this last batch of assays and it is unclear when the laboratory will recommence analysis.

BMG has now dispatched samples to ALS Global in Ireland for priority analyses. The Company apologises for this inconvenience and will release the results as soon as they are available.
