# 1. Investment Overview

## 1.1 Company Overview

### (a) Chilean Lithium Projects

The Company has entered into a binding and exclusive agreement with the owners of Lithium Chile Spa (**LCS Shareholders**) to form a joint venture to undertake the exploration and development of three lithium brine projects in Chile.

LCS is the holder of the projects comprising the Salar West Claims, Pajonales Claims and Natalie Claims in the Salar de Atacama and surrounding areas in northern Chile (**Chilean Lithium Projects**).

The projects are located in the 'lithium triangle' region of the Andes, encompassing parts of northern Chile, south-west Bolivia and north-west Argentina. This region hosts over 50% of the world's lithium resources and the largest and highest grade lithium brine deposits in the world.

The Chilean Lithium Projects comprise three areas of over 20,000 hectares (in total) in the Salar de Atacama, Salar de Pajonales and Salar de Tuyajto-Natalie regions of Chile.

The transaction follows an extensive period of review and evaluation by the Company of strategic investment opportunities. The Company identified battery minerals, principally lithium and cobalt, as high priority targets. Chile was prioritised being the world's best location for low cost, high grade lithium brine opportunities. The transaction meets the Company's investment criteria and represents a transformational opportunity for the Company.

LCS will be the joint venture entity in Chile which will own all right, title and interest in the Chilean Lithium Projects. BMG may earn-in to a 50% shareholding interest in LCS. The respective shareholding interests in LCS will be managed and operated in accordance with a shareholders agreement between BMG and the LCS Shareholders.

For further information on the Chilean Lithium Projects, refer to the Company's announcements to ASX made on 22 August 2018, 23 October 2018, 29 November 2018, 11 February 2019 and 18 February 2019, copies of which can be found on the Company's website ([www.bmgl.com.au](http://www.bmgl.com.au)) or the ASX announcements webpage for the Company (ASX Code "BMG").

Refer to Section 7.1(a) for further information on the terms of the agreement under which the joint venture is to be established and the Company may earn a 50% interest in LCS.

### (b) Treasure Project

BMG owns 30% of Treasure Development Limited (**TDL**) which owns the Treasure Project in Cyprus, where it has been exploring for high-grade copper-gold-zinc-silver and nickel-copper-cobalt-gold deposits. New Cyprus Copper Company Ltd (**New Cyprus**) owns 70% of TDL and is maintaining and funding TDL and the Treasure Project, with BMG retaining a free carried interest.

The Treasure Project has four project areas and currently comprises 10 licences for a total of 36.7 km<sup>2</sup>. It includes nine advanced prospects where copper (+Au-Zn-Ag) was mined after 1920 and eleven other prospects where evidence of similar mineralisation is exposed. In addition, the Black Pine project area contains the Pevkos and Laxia Prospects where exposed massive sulphide veins containing very high-grade copper, nickel, cobalt and gold have been successfully drilled, and two other prospects that are yet to be drilled.

New Cyprus is currently preparing an exploration programme to be agreed by BMG, and once completed during the next 1 - 2 years, BMG will transfer to New Cyprus an additional 20% of TDL (bringing New Cyprus's interest to 90%) and BMG will retain a 10% free-carried interest in TDL.

New Cyprus may increase its interest in TDL to 100% by acquiring the remaining 10% of TDL by either:

- (i) payment to BMG of \$2 million in cash within 12 months of reaching its 90% interest; or
- (ii) payment to BMG of a 1% net smelter royalty until \$2 million is received by BMG, plus a 10% share of any profits generated during that time.

## 2.11 **Application Moneys to be held on trust**

Application Money for New Securities under the New Securities Offer will be held by the Company on trust in accordance with the requirements of the Corporations Act until the Shares to which the Application Money relates are issued under the New Securities Offer, or a refund of Application Money occurs in the circumstances described in this Prospectus.

The Company will retain any interest earned on Application Money, including in the event of any refund of Application Money.

## 2.12 **Applicants outside of Australia**

This Prospectus does not constitute the offer of Securities in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the offer.

It is the responsibility of any Applicant who is resident outside Australia to ensure compliance with all laws of any country relevant to their Application, and any such Applicant should consult their professional adviser as to whether any government or other consents are required, or whether any formalities need to be observed to enable them to apply for and be issued New Securities. Return of a duly completed Application Form will constitute a representation and warranty by an Applicant that there has not been any breach of such regulations.

The Company has not taken any action to register or qualify the New Securities or the Offers, or otherwise to permit a public offering of Securities, in any jurisdiction outside Australia.

Prospective investors located outside Australia are advised that the information contained within this Prospectus has not been prepared with regard to matters that may be of particular concern to them. ## 2.13 **CHESS and issuer sponsorship**

The Company participates in the Clearing House Electronic Sub-Register System (**CHESS**), operated by ASX Settlement (a wholly owned subsidiary of ASX), in accordance with the Listing Rules and ASX Settlement Rules. The Company operates an electronic issuer-sponsored sub-register and an electronic CHESS sub-register. The two sub-registers together make up the Company's principal register of its Securities.

Under CHESS, the Company does not issue certificates to the holders of Securities. Instead, the Company provides holders with a Holding Statement (similar to a bank account statement) that sets out the number of Securities allotted and issued to them.

This Holding Statement also advises investors of either their Holder Identification Number (**HIN**) in the case of a holding on the CHESS sub-register or Security Holder Reference Number (**SRN**) in the case of a holding on the issuer sponsored sub-register.

A statement is routinely sent to holders at the end of any calendar month during which their holding changes. A holder may request a statement at any other time; however, a charge may be incurred for additional statements.

## 2.14 **Taxation implications**

The Directors do not consider that it is appropriate to give potential Applicants advice regarding the taxation consequences of applying for New Securities under this Prospectus, as it is not

possible to provide a comprehensive summary of the possible taxation positions for potential Applicants.

Neither the Company nor any of its advisers or officers accept any responsibility or liability for any taxation consequences to potential Applicants in relation to the Offers. Potential Applicants should, therefore, consult their own tax adviser in connection with the taxation implications of the Offers.

## 2.15 Privacy disclosure

The Company collects information about each Applicant from the Application Forms for the purpose of processing the Application and, if the Applicant is successful, for the purposes of administering the Applicant's Security holding in the Company.

By submitting an Application Form, each Applicant agrees that the Company may use the information in the Application Form for the purposes set out in this privacy disclosure statement.

The Company and the Securities Registry may disclose an Applicant's personal information for purposes related to the Applicant's investment to their agents and service providers including those listed below or as otherwise authorised under the *Privacy Act 1988* (Cth) (**Privacy Act**):

- (a) the Securities Registry for ongoing administration of the Company's register;

- (c) the printers and the mailing house for the purposes of preparing and distributing Holding Statements and for the handling of mail.

If an Applicant becomes a Security holder of the Company, the Corporations Act requires the Company to include information about the security holder (name, address and details of the Securities held) in its public register. This information must remain in the Company's register even if that person ceases to be a Security holder of the Company. Information contained in the Company's register is also used to facilitate distribution payments and corporate communications (including the Company's financial results, annual reports and other information that the Company may wish to communicate to its Security holders) and compliance by the Company with legal and regulatory requirements.

If an Applicant does not provide the information required on the Application Form, the Company may not be able to accept or process their Application.

Under the Privacy Act, a person may request access to their personal information held by (or on behalf of) the Company or the Securities Registry. An Applicant can request access to their personal information by writing to the Company through the Securities Registry.

#### 3.3 Effect on control of the Company

The issue of New Securities under the Offers will not have any effect on control of the Company.

The Company has managed the Placement such that no person will obtain a relevant interest in Shares of 20% or more.

The Company does not anticipate that the acquisition of Shares by any person under any Offer or the Placement will result in that person becoming a substantial Shareholder, or obtaining a relevant interest in Shares of 20% or more.

The Company therefore does not anticipate that the issue of Securities under the Offers or the Placement will have any material effect on control of the Company.

### 3.4 Substantial holdings

A “substantial holding” is defined under section 9 of the Corporations Act to mean a relevant interest in 5% or more of the voting shares of a company.

The table below sets out the Shareholders with a substantial holding based on the Company’s register of Shareholders as at the day before the Prospectus Date, ie. before the issue of Shares under the Placement.

**Notes:**

1. Percentage interest has been calculated based on 489,676,823 Shares on issue on the day before the Prospectus Date and before issue of 74,742,221 Shares under Placement.
2. The information in the table above has been extracted from the Company’s register of Shareholders as at the Prospectus Date, and not from substantial holding notices received from, or otherwise required to be provided by, the relevant Shareholders.

### 3.5 Effect on financial position of the Company

After paying the expenses of the Offers and Placement of approximately \$62,700 (exclusive of GST), there will be no net proceeds from the Offers. The expenses of the Offers will be met from the Company’s existing cash reserves and the Placement.

### 3.6 Pro forma statement of financial position

Set out below is:

- the audited statement of financial position of the Company as at 30 June 2018; and
- the unaudited pro forma statement of financial position of the Company as at 30 June 2018 incorporating the effect of the Offers and the Placement.

The unaudited pro forma statement of financial position has been derived from the audited financial statements of the Company, for the year ended 30 June 2018, and adjusted to reflect pro forma assets and liabilities of the Company as if completion of the Offers and Placement had occurred by 30 June 2018, and also for material adjustments noted below.

The pro-forma information is presented in an abbreviated form. It does not include all of the disclosures required by the Australian Accounting Standards applicable to annual financial statements.

The pro forma statement of financial position has been adjusted for the following material movements in the assets and liabilities of the Company between 30 June 2018 and the Prospectus Date:

- the issue of a total of 103,619,685 Shares at \$0.009 each on 8 November 2018 and on 7, 14 and 17 December 2018, raising a total of \$932,577 (before costs), less costs of \$97,152;

- costs of the Placement and the Offers will be approximately \$67,900;

- the Company has paid an amount of A\$53,851 for geophysics surveying, as part of the due diligence for the Chilean Lithium project acquisition. In the proforma statement of financial position; this amount is recognised as a reduction to cash and cash equivalents and an increase in accumulated losses.

Allowance has not been made for future cash payments in relation to the Chilean Lithium Projects disclosed at Section 7.1(a). ### 3.7 Potential dilutive effect of convertible securities

The table below sets out the potential dilutive effect on Shareholders if Shares are issued on the exercise of all existing Quoted Options and all proposed New Options following completion of:

- (a) the issue of 74,742,221 New Shares and 74,742,221 New Options under the Placement; and
- (b) the issue of 100,000 New Shares and 100,000 New Options under the New Securities Offer; and
- (c) 15,000,000 New Options to the Lead Manager.

Event	Number of Shares pre-exercise of Options	Shares issued on Option exercise	Number of Shares post-issue	Dilution (rounded)
Exercise of existing Quoted Options	564,519,044	263,426,781	827,945,825	32.81%%
Exercise of New Options issued under the Placement	564,519,044	74,742,221	629,261,265	11.88%
Exercise of New Options issued under the New Securities Offer	564,519,044	100,000	564,619,044	0.02%
Exercise of New Options issued to the Lead Manager	564,519,044	15,000,000	579,519,044	25.88%

**Note:**

The interests shown in the table above assume that:

1. the existing Quoted Options do not lapse prior to exercise or conversion;
2. the existing unquoted Options are not exercised as the unquoted Options have exercise prices in excess of \$0.35, which is well in excess of the current market price of Shares; accordingly, it is not anticipated that these Options will be exercised in the foreseeable future; and
3. other Shares are not issued prior to exercise of Options.

## 4. Risk Factors

---

### 4.1 Introduction

Activities in the Company and its controlled entities, as in any business, are subject to risks which may impact upon the Company's future performance. There can be no guarantee that the Company will achieve its stated objectives.

Potential investors should read the entire Prospectus and review announcements made by the Company to ASX (at [www.asx.com.au](http://www.asx.com.au) under the code "BMG") in order to gain an appreciation of the Company, its activities, operations, financial position and prospects.

An investment in the Company's Securities should be considered speculative. Securities carry no guarantee with respect to the payment of any dividends, returns of capital or the market value of those Securities.

Potential investors should consider the risk factors set out in Section 1.6 above and in Sections 4.2 and 4.3 below which the Directors believe represent some of the general and specific risks that Shareholders should be aware of when evaluating the Company and deciding whether to acquire any Securities in the Company. The following risk factors are not intended to be an exhaustive list of all of the risk factors to which the Company is exposed.

### 4.2 Additional specific risks relating to the Company

In addition to the key risks out in Section 1.6 above, the following risks have been identified as being risks specific to an investment in the Company. These risks may adversely affect the Company's financial position, prospects and price of its listed securities.

#### Exploration and development risks

- (a) **Exploration and ability to exploit successful discoveries:** It may not always be possible for the Company to exploit successful discoveries which may be made in areas in which the Company has an interest. Such exploitation would involve obtaining the necessary licences or clearances from relevant authorities that may require conditions to be satisfied and/or the exercise of discretions by such authorities. It may or may not be possible for such conditions to be satisfied. Further, the decision to proceed to further exploitation may require participation of other companies whose interests and objectives may not be the same as the Company's.
- (b) **Mining and development risks:** Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management. Mining and development operations can be hampered by force majeure circumstances, environmental considerations and cost overruns for unforeseen events.
- (c) **Exploration costs:** The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that cost estimates and underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.
- (d) **Environmental risks:** The operations and activities of the Company are subject to its environmental laws and regulations. As with most exploration projects and mining operations, the Company's operations and activities are expected to have an effect on the environment, particularly if advanced exploration or mine development proceeds. The Company attempts to conduct its operations and activities to the highest standard of environmental obligation, including compliance with all environmental laws.

- (e) **Successful development of projects:** The business of exploration, project development and mining contains risks by its very nature. To prosper, it depends on the successful exploration and/or acquisition of reserves, design and construction of efficient production/processing facilities, competent operation and managerial performance and proficient marketing of the product. In particular, exploration is a speculative endeavour and force majeure circumstances, cost overruns and other unforeseen events can hamper mining operations.
- (f) **Realising value from projects:** The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits; failure to achieve predicted grades in exploration and mining; operational and technical difficulties encountered in mining; difficulties in commissioning and operating plant and equipment; mechanical failure or plant breakdown; unanticipated metallurgical problems which may affect extraction costs; adverse weather conditions; industrial and environmental accidents; industrial disputes; and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its tenement interests. Until the Company is able to realise value from its projects, it is likely to incur ongoing operating losses.

#### **Other risks specific to the Company**

- (a) **Commodities price and exchange rate fluctuations:** The revenue derived through the sale of mineral commodities exposes the potential income of the Company to mineral commodities price and exchange rate risks. Commodity prices fluctuate and are affected by numerous factors beyond the control of the Company. These factors include world demand for commodities, forward selling by producers and the level of production costs in major commodity-producing regions. Moreover, commodity prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, commodities.

Furthermore, the international prices of most commodities are denominated in United States dollars, whereas any income and the expenditure of the Company are and will be taken into account in the Australian dollar, exposing the Company to the fluctuations and volatility of the rates of exchange between those currencies.

- (b) **Future capital requirements:** The Company may require substantial further financing in the future for its business activities, in addition to amounts raised pursuant to the Offers. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the current market price (or the price under the Offers) or may involve restrictive covenants which limit the Company's operations and business strategy.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce, delay or suspend its operations and this could have a material adverse effect on the Company's activities and could affect the Company's ability to continue as a going concern.

- (c) **Joint venture parties, agents and contractors:** There is a risk of financial failure or default by a participant in any joint venture to which the Company is, or may become, a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.
- (d) **Competition:** The Company competes with other companies, including major mining companies in Australia and internationally. Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Company can compete effectively with these companies.

- (e) **Key personnel:** Recruiting and retaining qualified personnel are important to the Company's success. The number of persons skilled in the exploration and development of mining properties is limited and competition for such persons is strong. There can be no assurance given that there will be no detrimental impact on the Company if such persons employed cease their employment with the Company.
- (f) **Insurance risk:** In certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance of all risks associated with mineral exploration and production is not always available and where available the costs can be prohibitive.

- (g) **Potential acquisitions:** As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions of companies, products, technologies or resource projects.

### 4.3 General investment risks

The business activities of the Company are subject to various general economic and investment risks that may impact on the future performance of the Company. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. There are a number of general economic and investment risk factors that apply to companies generally and may include economic, financial, market or regulatory conditions. These risk factors include, but are not limited to, the following:

- (a) **General economic conditions:** Economic conditions, both domestic and global, may affect the performance of the Company. Factors such as fluctuations in currencies, commodity prices, inflation, interest rates, supply and demand and industrial disruption may have an impact on operating costs and share market prices. The Company's future possible revenues and Securities prices can be affected by these factors, all of which are beyond the control of the Company and its Directors.
- (b) **Equity market conditions** Securities quoted on the securities market can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. These security market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance.

General factors that may affect the market price of securities include economic conditions in both Australia and internationally, investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

- (c) **Liquidity risk:** There can be no guarantee that there will be an active market for the New Shares or New Options, or that the trading price of the New Shares and New Options will increase. Noting the current state of equity capital markets, there has been and may continue to be relatively few buyers or sellers of New Shares and New Options on ASX at any given time. This may affect the volatility of the market price of the New Shares and New Options. It may also affect the prevailing market price at which holders are able to sell their New Shares and New Options.

- (d) **Changes in government policy & legislation:** Any material adverse changes in relevant government policies or legislation of Australia or internationally may affect the viability and profitability of the Company, and consequent returns to investors.
- (e) **Investment risk:** The New Securities offered pursuant to this Prospectus should be considered speculative due to the nature of the Company's business. There cannot be any assurance as to payment of dividends, return of capital or the market value of New Securities. In particular, the price at which an investor may be able to trade New Securities may be above or below the price paid for those New Securities.
- (f) **Other:** Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of the Company.
